COMMUNICATIONS

Letter From the Managing Editor

Ortho Dedication

The editorial staff of *Immunohematology* is grateful to Ortho Diagnostic Systems, Inc., for its generous contribution each year in support of the publication of the September issue of the journal. This is the fifth year that Ortho has made this contribution, and the third year that copies of each issue have been sent to Ortho Banker's Club members.

Ortho Diagnostic Systems, Inc., is a leading worldwide manufacturer and distributor of reagents for the blood bank laboratory. This leadership is exhibited through the development and distribution of monoclonal antisera, infectious disease screening tests, RhoGAM™, Rh immune globulin, and education training and support.

We thank Ortho Diagnostic Systems, Inc., for its continuing support.

Mary H. McGinniss

Journal Holder, Rh Issue, Increase in Subscription Rates

Good news! Subscribers will receive their standing magazine holder for *Immunohematology* with their December journal. A special envelope has been ordered so that both the journal and the holder can be mailed together. This is a 10th anniversary gift to you, our subscribers, whose support has enabled us to continue to publish and improve the journal.

More good news! The December journal will be the long-awaited Rh issue. So far, we have received six excellent papers, and Dr. Peter Issitt is preparing an editorial on the Rh system. He will comment in general on some aspects of the Rh system, and specifically on each article in the issue by putting the findings in perspective in terms of the whole Rh picture.

The editors regret that the rising costs of publishing require us to raise the subscription rates for 1995. In 1995, subscriptions will be $25.00 for domestic subscribers and $30.00 for foreign subscribers. The journal continues to expand in both prestige and quality of published articles and we ask for your continued support.

Delores Mallory
Editor-in-Chief
