Correction

I was notified by colleagues that there is an error in the article “ABO genotyping by polymerase chain reaction-restriction fragment length polymorphism,” in *Immunohematology* 1996;12:143-8. The last sentence of the 3rd paragraph on page 143 should read: “The A transferase catalyses the addition of N-acetylgalactosamine to the H antigen, while the B transferase catalyses the addition of galactose.”

I regret any inconvenience to your readers.

Sincerely,
Nicole Mifsud, BSc

Letters From the Editors

Immunohematology Is on the World Wide Web

The letter from the editors’ in Volume 12, Number 4 of *Immunohematology* announced that the journal is now accessible on the Web. Let me update you on the addresses and services currently available.

The address is:
http://biomed.redcross.org/immunohematology/

The addresses of the American Red Cross home page are:

http://biomed.redcross.org
and click on Our Services
and click on Blood and Tissue Services
and click on Immunohematology

Services on this Web site are:

Online Issues—Eventually we will have the abstracts from every article published since Volume 1, Number 1. In many cases, one article from each issue will be available in its entirety.

Site Search—If you want to find out if a subject has been published in *Immunohematology*, just enter the word or phrase and a search of all issues will occur.

Subscription Information—you can find out the cost and where to mail your check for a one-year (or more!) subscription, or you can enter your credit card number on a secure line and subscribe immediately. Remember, we publish four times a year in March, June, September, and December.

Letter to the Editors—Fill in the information in the form supplied for letters that you want to be considered for publication in *Immunohematology*. This is a fast way to get your thoughts to the editors. You can also click on e-mail and ask a question, give an opinion, or make a request of the editors.

Information for Authors—Everything you need to know about writing a manuscript in the style of *Immunohematology*. You should read this before starting your article. It is also published in the March hard-copy issue of *Immunohematology*.

Editorial Board—Names of the editors of the journal, who are vital to the success, style, and direction of the journal. You can click on the name of the editor-in-chief and send a message or question.

Related Sites—Click on any of these sites and you will be at another home page of a blood banking organization. If you would like your organization to be considered as a related site, ask the editor-in-chief by clicking on the name under Editorial Board (see above) or send an e-mail to dmallory@usa.redcross.org

It will take time to get all the back issues of the journal on the page so please be patient. There has been a delay in getting the secure site subscription procedure in place, so keep trying or use the subscription card in the print copy.

1996 Review

Many outstanding articles (31) were published in *Immunohematology* in 1996. Included were several articles in our new category, platelet and white cell serology, and several on the biochemistry of blood groups. We thank the authors who contributed articles and the Editorial Board, whose names are listed in the front of each issue. The members of the board assist us in making all decisions involved with publication of the journal, in addition to reviewing articles submitted for publication.

We also thank the following individuals who have assisted us, upon special request, in reviewing and selecting papers for publication.

Richard Aster, MD Virginia Hare, MT(ASCP)SBB
John Case, FIBMS W. John Judd, FIBMS, MIBiol
Ann Church, MT(ASCP)SBB Melanie Kennedy, MD
Mary N. Crawford, MD Mary Ann Keashen-Schnell, BS
Janis R. Hamilton, MT(ASCP)SBB Naomi C. Lubin, MD
