ERRATA

Vol. 21, No. 4, 2005; page 146
Reactivity of FDA-approved anti-D reagents with partial D red blood cells
The author has informed the editors of Immunohematology that there is an error on page 146, second column, first sentence. The sentence should read “Individuals whose RBCs are characterized as having a weak D phenotype usually do not make anti-D if exposed to D+ RBCs…”

Vol. 21, No. 4, 2005; page 171
IN MEMORIAM Tibor J. Greenwalt, MD
A reader has informed the editors of Immunohematology that there is an error on page 171, second paragraph, sixth sentence. The sentence should read “He was Clinical Professor of Medicine at George Washington University School of Medicine…”

Attention: State Blood Bank Meeting Organizers
If you are planning a state meeting and would like copies of Immunohematology for distribution, please contact Cindy Flickinger, Managing Editor, 4 months in advance, by fax or e-mail at (215) 451-2538 or flickingerc@usa.redcross.org.

Manuscripts: The editorial staff of Immunohematology welcomes manuscripts pertaining to blood group serology and education for consideration for publication. We are especially interested in case reports, papers on platelet and white cell serology, scientific articles covering original investigations, and papers on new methods for use in the blood bank. Deadlines for receipt of manuscripts for consideration for the March, June, September, and December issues are the first weeks in November, February, May, and August, respectively. For instructions for scientific articles, case reports, and review articles, see “Instructions for Authors” in every issue of Immunohematology or on the Web. Include fax and phone numbers and e-mail address with your manuscript.
