Concordance of two polymerase chain reaction–based blood
group genotyping platforms for patients with sickle cell disease
C.A. Sheppard, N.L. Bolen, G. Meny, M. Kalvelage, and G. Ochoa-Garay

A resource-conserving serologic and high-throughput molecular
approach to screen for blood donors with an IN:–5 phenotype
S.R. Joshi, S. Senjaliya, K. Srivastava, and W.A. Flegel

Prevalence of DEL phenotype in D– blood donors in India
R. Chaudhary, S. Verma, and A. Verma

Clinical impacts of DNA-based typing and provision of antigen-
matched red blood cell units for chronically transfused patients
with thalassemia
P. Watanaboonyongcharoen, S. Onspun, and P. Rojnuckarin

Identifying obstetrics patients in whom RHD genotyping can be
used to assess risk of D alloimmunization
T.N. Horn, J. Keller, M.A. Keller, and L. Klinger

Identification of rare blood types in southern Brazil: impact on
transfusion support
C.D.S.R. de Araújo, B.A. Machado, C.D. Reche, L. Maroni, L.C. Garlet,
M.M.P. dos Santos, M. Beber, A. Pasqualotti, and L. Castilho

Blood component administration to patients with multiple
myeloma treated with daratumumab: suggesting a novel approach
with use of 0.1 M dithiothreitol
P. Pandey, D. Setya, E. Kaul, S. Ranjan, M.K. Singh, and A. Shankar
