

Correction—Volume 7, Number 2, 1991

The article entitled "Use of a modified acid/EDTA elution technique" in Immunohematology, Volume 7, Number 2, 1991, contained an error in the Materials and Methods section.

The instructions for preparation of 1.0M TRIS-NaCl should read as follows:

1.0M TRIS-NaCl
12.1g Tris (hydroxymethyl) aminomethane [TRIS]
5.25g sodium chloride
Make up to 100 mL with distilled water.

I would like to thank Peggy Spruel at Gamma Biologics Inc., Houston, TX, for pointing out this error. Please accept my apologies for any inconvenience caused.

Peter C. Byrne, National Reference Laboratory for Blood Group Serology, American Red Cross, 15601 Crabbs Branch Way, Rockville, MD 20855.
