Your Paper's Title Starts Here: Please Center use Helvetica (Arial) 14
FULL First Author¹, FULL Second Author² and Others³ (font 12)
¹Full address of first author, including country, email
²Full address of second author, including country, email
³List all distinct addresses in the same way, email

For the rest of the paper, please use Times Roman (Times New Roman) 12, justify: full

Abstract. This document explains and demonstrates how to prepare your manuscript for American Journal of Engineering and Technology Research. Please read these instructions and follow the outline of this text. The text area for your manuscript must be 17 cm wide and 25 cm high (6.7 and 9.8 inches, resp.). Please set your page as ANSI A size paper (letter).

Keywords: List the keywords covered in your paper. These keywords will also be used by the publisher to produce a keyword index. Between the keyword use comma.

1. Introduction

All manuscripts must be in English. We are not responsible for lose in the mail or email. By submitting the manuscript, authors grant the Journal the copyright for publishing purpose. Should authors use contents from other Publications, they must be legally cited without copyright infringement.

2. Organization of the Text

2.1 Section Headings.
The section headings are in boldface capital and lowercase letters. Second level headings are typed as part of the succeeding paragraph (like the subsection heading of this paragraph).

2.2 Page Numbers.

2.3 Tables.
Tables (refer with: Table 1, Table 2, ...) should be presented as part of the text, but in such a way as to avoid confusion with the text. A descriptive title should be placed above each table. The caption should be self-contained and placed below or beside the table. Units in tables should be given in square brackets [meV]. If square brackets are not available, use curly {meV} or standard brackets (meV).

2.4 Special Signs.
For example , $\alpha$ γ μ Ω () ≥ ± ● Γ {11 20} should always be written in with the fonts Times New Roman or Arial

2.5 Figures.
Figures (refer with: Fig. 1, Fig. 2, ...) also should be presented as part of the text, leaving enough space so that the caption will not be confused with the text. The caption should be self-contained and placed below or beside the figure. Generally, only original drawings or photographic reproductions are acceptable. Please include your figures as graphic images in the electronic version. For best quality the pictures should have a resolution of at least 300 dpi(dots per inch).

Color figures are welcome.

Equations.
Equations (refer with: Eq. 1, Eq. 2, ...) should be indented 5 mm (0.2"). There should be one line of space above the equation and one line of space below it before the text continues. The equations have to be numbered sequentially, and the number put in parentheses at the right-hand
edge of the text. Equations should be punctuated as if they were an ordinary part of the text. Punctuation appears after the equation but before the equation number, e.g.

\[ c^2 = a^2 + b^2. \]  

(1)

3. Literature References

References are cited in the text just by square brackets [1]. (If square brackets are not available, slashes may be used instead, e.g. /2/.) Two or more references at a time may be put in one set of brackets [3,4]. The references are to be numbered in the order in which they are cited in the text and are to be listed at the end of the contribution under a heading References, see our example below.

4.

5.

References

Author Brief and Sponsors or Supporters.

The author's brief introduction is within 200 words and only the first author. The Sponsors must have the fund Numbers.
